Using Online Courses with Inmates: Teach Them?  

Civility towards all is one of four DRC core values. Join us to explore how civility is approached in various educational systems, share how you experience civility in your correctional setting, and discuss ways to confront the ways it continues to permeate American society in both obvious and subtle ways.

This documentary premiered on HBO last month and is now available for screening for activists, educators, and professionals working with incarcerated people and those affected by Incarceration.  

In this workshop, Daniel Skinner, Ph.D., Co-editor of Not Far from Me: Stories of Opioids and Ohio (OSU Press, 2019), Dan is the author of Medical Necessity: Health Care Access and the Politics of Decision Making (forthcoming this fall with the University of Texas Press), is the director of the University of Texas’ Medical Humanities Program and a faculty member in the Department of Health and Society at the University of Texas at Tyler.  

In this workshop, we will discuss the importance of using online courses for high school diploma completion and other options.  

only belong to the Education Department but also what the local administration believes you can provide. We want to discuss how we can incorporate this in our educational plans and services.  

Several presenters bring personal experiences in prison as well as their lives now. They will offer suggestions on how to better serve your students and teach more effectively to the needs of the individual.  

This workshop will include forms used to design a good IEP, and tips to teachers on how to better serve their students and teach more effectively to the needs of the individual.  

This workshop will demonstrate a writing formula developed by J. E. Sparks and adopted by Teachers get burnt out from working and often we forget “WHY” we went into teaching. This workshop will be a “return to roots” for teachers, drawing upon educational psychology, pedagogy, and the history of education to help them address the needs of their students and find ways to re-engage with the profession.

Join us for a discussion of the value of a writing formula in purposeful writing, with examples of work by two students with disabilities.

This workshop will be a “return to roots” for teachers, drawing upon educational psychology, pedagogy, and the history of education to help them address the needs of their students and find ways to re-engage with the profession.

Please send contract.
